

PawPal

PawPal

Author: Robert 'Jack' Webber
Manager: Niall O'Keeffe
BEng Software & Electronic Engineering

Summary

PawPal is a digital aggregator of everything a dog owner needs to keep track of, all in one convenient location.

The site is designed to support dog owners by maintaining information about their dog's health, development, and well-being throughout all stages of life.

PawPal utilizes user inputs to create a dedicated space in which users can keep track of upcoming events, general trends in health, all while ensuring clean presentation for reading and sharing.

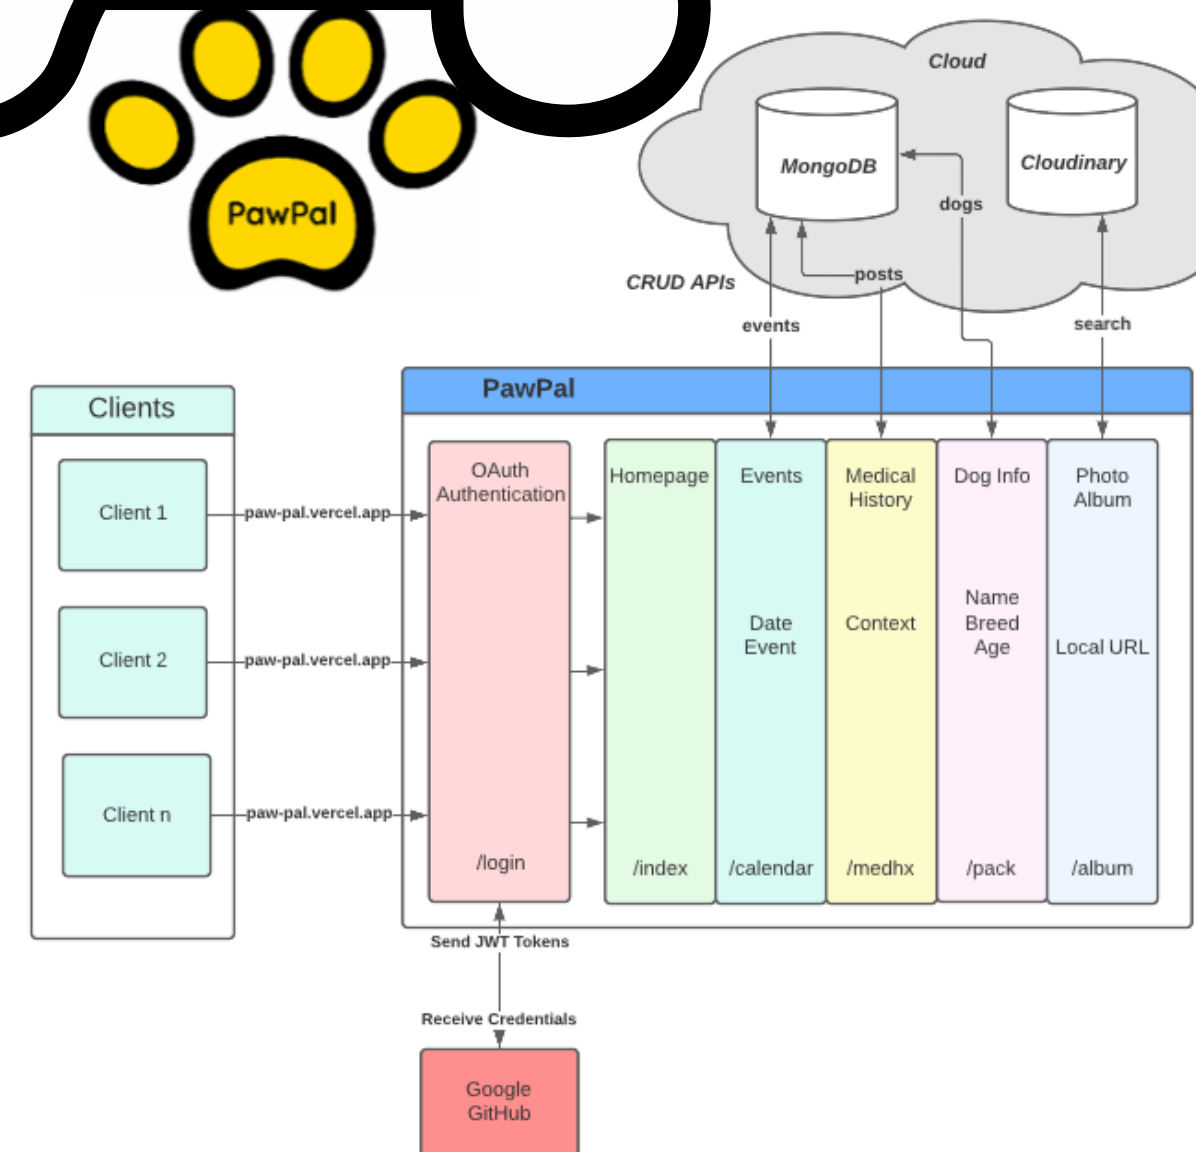

Authentication

Password-less authentication is handled by NextAuth. Credentials are provided to hosts (Google or GitHub) and JSON web tokens are returned.
